

Printed Circuit Flux Remover

Formulated and manufactured in the UK our ultrasonic Flux remover is used by professionals around the world. Its fast acting formulation breaks down flux, oil, grease, water residue deposits providing outstanding results.

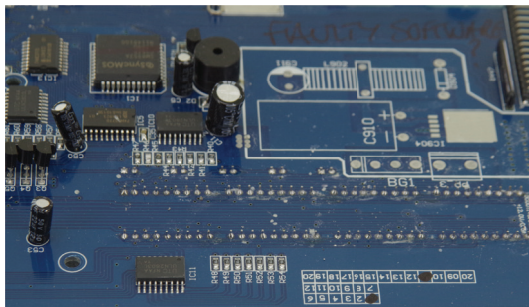

Cleaning circuit boards can lead to reduced component failure and prolong the life.

- A specialist formulation for adding to Ultrasonic baths for removing flux from soldering and deposits left from water damage circuits.
- The Cleaning process safely removes contaminants and will not damage, corrode or darken metal components.
- Safe on brass, copper, aluminium and other sensitive metals.
- Concentrated solution at ratio of 1:10 with water (we recommend using deionised / demineralised water).
